

CHAPTER 5: ACTION PLAN RECOMMENDATIONS

REDISCOVER OUR PARKS Parks and Outdoor Recreation Master Plan is a higher level document identifying the needs and recommendations for consideration in both Parks Capital and Parks Operational Budgets for the next 20 years. While the recommendations contained within are for the higher level, they provide direction for an Action Plan which is to be completed in 2016.

That Action Plan will detail each recommendation with internal departmental staff requirements, external agencies who may be involved in the implementation, priorities for consideration. As this is a twenty-year plan, a timeframe for completion has also been identified to assist future Operational and Capital Budgetary considerations.

In this chapter, the recommendations found in the body of this document have been summarized. Guiding Principles which each recommendation embodies is identified. A list of studies to be undertaken and policies and procedures to be written has been highlighted to identify the staff resources requirements of Parks.

8.08	Review and develop designated areas in parks for spraypads throughout the city.											
8.09	Review and develop a sport court strategy for the whole city to determine appropriate locations.											
8.10	Review and develop an outdoor swimming facilities strategy to ensure adequate access for all users.											
8.11	Adopt a policy with Asset Management that establishes level of service for the maintenance and operation of parks.											
8.12	To establish a 'Management Plan' for each city park and open space.											
8.13	To develop 'Park Design Standards', and adoption of policies to improve and reduce maintenance costs, while achieving an aesthetically pleasing environment for each park type.											
8.14	To standardize park maintenance and level of service, as well as lifecycle costing by formalizing Parks Operations inspection and management standards as " <u>C.I.T.E.</u> " based on: - C lassification and location of the park – setting, ranging from very natural to urban. - I nfrastucture – type, age, condition, replacement cycle. - T ype and amount of use – numbers of people, demographics served, times of highest use. - E nvironmental characteristics – sensitivity of vegetation and wildlife, amount of shade from trees provided.											
8.15	Review the current City Forestry's Tree Nursery and determine its needs and identify an appropriate location in order for forestry to maintain an acceptable level of service and a reliable source for carolinian tree species as well as boulevard trees.											
8.16	Establish and adopt an ongoing GIS referenced AutoCAD based data inventory in collaboration with Asset Management and Geomatics of all park assets including the purchase of computerized digital systems and equipment as needed to capture assets within the park system.
